

## **Janet Sibarium**

*The Educational Alliance Art School is a vital part of lower Manhattan arts education. The Art School must remain on the 5th floor with large windows, natural light and high ceilings. The natural light is absolutely necessary, especially for middle aged and senior students, who need the contrast and natural light to see their 3 dimensional work. When I've taken the evening classes, it's must more difficult to see and eyestraining. Daytime classes in abundant natural light are an essential part of stone carving and sculpture.*
